Projects

Field Force/Sales Force Software   **Website Link**

Inventory, Management Software using CakePHP as a Back-end language. Rest API for Multiple Android App. Some of the module i build listed below". Those are:

- Survey Module
- Attendance Module
- Regularization Module

Double Entry Accounting Software   **Website Link**

Double entry, a fundamental concept underlying present-day bookkeeping and accounting, states that every financial transaction has equal and opposite effects in at least two different accounts. It is a Laravel project that I built some futures for "Arena Phone BD Ltd". Those are:

- Ledgers Creation Modules.
- Debit, Credit, Journal, Contra Voucher module.
- Depreciation Setting Module.
- Report generate for Ledgers, Debit, Credit, Journal, Trial balance, Balance sheet.
- Bank Reconciliation Module.

School Management Software

Educlerk is a cloud based responsive software with mobile app, SMS service developed by Arena Phone Bd Ltd. I've been assigned the role of support engineer for this software. In this project, the Codeigniter framework is used in the backend. I integrate some of the modules. Those are:

- Payment Gateway (SSLCOMMERZ, Bkash).
- Payment Report.
- Attendance module.

Economic Calendar   **GitHub Link**

Investors use an economic calendar to keep track of market-moving events like economic indicators and monetary policy decisions. It is a Laravel project that I built some futures for "IT Corner". Those are:

- Day Filter(Last Seven Day, Yesterday, Today, Tomorrow, Next Seven Day).
- Filter By a Specific Date.
- Filter By Timezone.
- Filter By Countries. Multiple Countries, And single Country Can be filter.
- Filter Using Importance Level(High, Medium, Low).
- Filter Using Search Field.

E-commerce website   **GitHub Link**

A full featured online shopping project using PHP as back-end, MySQL as database and Bootstrap as front-end. It is a multi-vendor e-commerce website with GPS technology integration.
